

## Technical Description

### Compact Plus 3-Arm

The motorized 3-arm Compact Plus turnstile with design railing, its robust, weatherproof powder-coated housing and with an integrated height-adjustable support is well-suited for use in a battery of turnstiles at high-traffic outdoor access points.

Card readers can be installed to the housing or to the railing via the optional reader mounting.

Compact Plus is also available in a stainless steel version with a fixed height.

A large selection of specialty equipment means it can be tailored to individual requirements.

#### Features

- Design railing to guide traffic
- Height adjustable
- Optional INOX with fixed height
- Pre-assembled on delivery
- Silent running
- Single or bidirectional operation
- Reversible entry direction
- High traffic capacity
- Long service life
- Secure traffic separation
- Integrated LOGITURN® control unit
- Maintenance-free mechanism
- Extensive range of accessories

#### Applications

- Ski lifts
- Sports facilities
- Outdoor swimming pools
- Recreational facilities

#### Models/Options

- 3-arm height-adjustable turnstile
- 3-arm fixed-height INOX turnstile

#### Options:

- Climb-over/crawl-under protection
- Sensor start
- Grating for mobile setup

## Technical Description

### Compact Plus 3-Arm

#### Technical data

Power supply:	230 V ~ / 24V =
Power consumption:	max. 50 VA
Storage temperature:	-40°C to +40°C
Operating temperature:	-20°C to +50°C
Total width/passage width:	305 mm / 577 mm
Length:	1550 mm
Height:	1.000 - 1.365 mm
Weight:	65 kg
Material:	
Housing:	Steel, powder-coated, optional CrNi steel
Turnstile:	CrNi steel grade 1.4301

#### Function

In normal operating mode, an electric brake locks the turning arms in place. The brake is released by the reader system or an optional external manual control so that the arms can turn freely in the appropriate direction.

A slight pressure activates the drive, which rotates the arms 120°. Internal sensors prevent the arms from hitting the person passing through and causing injury. Once passage is completed, the turnstile sends a signal to the reader.

To prevent injuries in case of panic, a slip clutch allows the unit to be activated with a force of at least 40 kN when locked if an alarm is triggered.

When not powered, the arms can be turned manually with little force.

### Standards & Regulations

CE Machinery Guidelines

UL 94 V-0

EN 64312 (formally ÖNORM 4150)

Degree of protection: IP 43 as per EN 60529

Manufacturing standard: ISO 9001

### Electrical Connections

#### Inputs:

- Reader release, entry direction
- Reader release, exit direction
- Single release button, entry direction
- Single release button, exit direction
- Continuous release switch, entry direction
- Continuous release switch, exit direction
- Stop button

#### Outputs:

- External entry counter, non-resettable
- External exit counter, non-resettable
- External signal light
- Feedback

#### Models:

- 6COP3AEB:** Compact Plus 3-Arm height adjustable
- 6COP3AEC:** Compact Plus 3-Arm stainless steel, fixed height

#### Options:

- 2P412-N:** Touchless sensor start
- 2P414-N:** Light barrier activator
- 2P782-N:** Climb-over/crawl-under protection (Monitors turnstile arms)
- 2P784-N:** Climb-over protection (Monitors turnstile cover and arms)
- 2P783-N:** Climb-over/crawl-under protection (Monitors turnstile body, arms and top)
- 21767-N:** Red/Green signal light, LED 60 mm
- 21763-N:** Release signal LED 60 mm for 2 directions
- 21700-N:** Reader mounting

#### Matching Products:

- 21500K:** Grating for mobile setup
- 21510K:** Railing for grating
- 8P408-N:** LOGITURN control panel
- 8P407-N:** Surface mounted housing for control panel
- 8P409-N:** LOGITURN preset counter
- 8P413-N:** Random number generator
- 21692:** Base console for mounting to non-load-bearing substrates
